VISIT RECORD AND PRESCRIPTION DOCUMENTATION For Patient Records

Patient Name: Eric Isabel Lambert
Student ID: LU20240847
Date of Birth: October 14, 2005
Address: 6812 N. Sheridan Road, Apt 2C, Chicago, IL 60626
Phone: (773) 555-0142
Email: eric.lambert@Finthesiss.ai
Insurance: Covered on parent plan (Roberto Lambert) through age 26
Primary Provider at Student Health: Dr. Amy Chen, MD

VISIT 1 - QUARTERLY CHECK-IN

Date: October 14, 2025
Visit Type: Routine quarterly follow-up
Provider: Dr. Amy Chen, MD
Chief Complaint / Reason for Visit:
Quarterly medication review for sertraline (GAD) and ongoing IBS-D management.
No new acute concerns reported.

Vital Signs:

Blood Pressure: 118/74 mmHg
Heart Rate: 68 bpm
Weight: 162 lbs
Temperature: 98.4 F

Patient-Reported Status:

- Sertraline 50mg: Patient reports continued benefit, no significant side effects. Sleep quality variable around exam periods; using white noise app, helpful.
- IBS-D: Manageable with dietary modification. Patient continues to avoid identified triggers (heavy dairy, fried food, raw onion, excessive caffeine). Loperamide used as needed; 2 to 3 uses per month on average.
- Exercise: Irregular but present. Campus walking daily, occasional running.
- Mental health: Working with Dr. Maria Espinoza at Counseling Center, biweekly.

Assessment:

Sertraline 50mg appears to be providing stable benefit without adverse effects. IBS-D is being managed effectively with behavioral strategies. No changes to current treatment plan indicated at this time.

Plan:

1. Continue sertraline 50mg daily, taken in the morning.
2. Continue loperamide 2mg as needed for IBS-D flares.
3. Next quarterly check-in: January 2026.
4. Continue coordination with Dr. Espinoza at Counseling Center.
5. Patient counseled to maintain medication consistency during final exams.

PRESCRIPTION RECORD AS OF OCTOBER 14, 2025

Medication	Dose	Frequency	Refills	Prescriber
Sertraline HCl	50mg	Once daily AM	3	Dr. Amy Chen, MD
Loperamide HCl	2mg	As needed (IBS)	1	Dr. Amy Chen, MD

Pharmacy: CVS Pharmacy, 6800 N. Sheridan Road, Chicago, IL 60626
(773) 555-0888

VISIT 2 - ACUTE VISIT

Date: January 14, 2026
Visit Type: Acute visit - GI symptoms
Provider: Dr. Amy Chen, MD
Reason: Patient reported a moderate IBS flare lasting approximately 36 hours

following a period of high academic and social stress (start of spring semester, two course retakes, anxiety about performance).

Assessment: Consistent with IBS-D exacerbation under acute stress. No new organic pathology suspected. Reviewed trigger avoidance strategy and stress management techniques. Patient reminded to use loperamide early in flare.

Plan:

1. Loperamide 2mg at first sign of flare, may repeat after first loose stool (not to exceed 4mg/day without physician direction).
2. Temporary dietary simplification during high-stress weeks (rice, banana, applesauce, toast approach as tolerated).
3. Reinforce with Dr. Espinoza regarding stress contribution to GI symptoms.
4. Next scheduled check-in: October 2026 (quarterly schedule maintained).

NOTE

This record is confidential. Patient has authorized use for personal records and authorized sharing with Dr. Maria Espinoza at Lakeview Counseling Center for coordinated care purposes only.
