Interest Calculation Detail and Account Growth

How Your Interest Is Calculated

Your High-Yield Savings Account earns interest based on the daily periodic rate applied to your daily collected balance. The current Annual Percentage Yield (APY) is 4.75%, which corresponds to a daily periodic rate of approximately 0.01301%.

Interest is compounded daily and credited to your account on the last business day of each month. The APY is variable and may change at any time. Southern Heritage Bank will notify account holders of APY changes with at least 30 days advance notice per Regulation DD requirements.

July calculation: Average daily balance \$36,290.32 x 31 days x 0.0001301 = \$146.31 (pre-rounding, credited as \$143.22 after regulatory adjustments).

August calculation: Average daily balance \$36,535.22 x 31 days x 0.0001301 = \$147.35 (credited \$144.38).

September calculation: Average daily balance \$36,680.44 x 30 days x 0.0001301 = \$143.17 (credited \$144.22).
