Laboratory Results and Visit Summary

Patient:	Catherine Anne Atkins
Date of Birth:	November 14, 1977
Visit Date:	January 8, 2026
Provider:	Dr. Helen Marsh, MD
Reason:	Annual physical examination

Lipid and Liver Panel

Test	Result	Reference Range	Flag
Total Cholesterol	212 mg/dL	Under 200	High
LDL Cholesterol	138 mg/dL	Under 100	High
HDL Cholesterol	61 mg/dL	Over 50	Normal
Triglycerides	118 mg/dL	Under 150	Normal
ALT	24 U/L	7 to 56	Normal
AST	21 U/L	10 to 40	Normal
GGT	29 U/L	9 to 48	Normal

Assessment and Plan

Overall health is good. Body mass index is slightly above the normal range. LDL cholesterol remains borderline high at 138. Given frequent professional wine tasting, liver enzymes were checked and are all within normal limits, which is reassuring. Continue omega-3 fish oil at 1 gram daily, the daily multivitamin, and milk thistle. Recommend dietary adjustment to reduce saturated fat, continued cycling three to four times per week, and a repeat lipid panel at the next annual physical in January 2027. No medication started at this time.
