Assessment and advice

Overall well. Iron stores and haemoglobin slightly low, consistent with a vegetarian diet and high physical output. Vitamin D low, common indoors. No other concerns. Cardiovascular and metabolic markers good for age and excellent for activity level.

Plan: continue prescribed oral iron for three months then recheck. Vitamin D supplement, 60,000 IU weekly for eight weeks. Maintain dietary iron, leafy greens, dates, jaggery. Continue current activity. Bedtime chamomile fine. Recheck haemoglobin and ferritin at the next annual visit, or sooner if fatigue increases. Strict lacto-vegetarian diet noted, no allergies recorded.
