## ANNUAL WELLNESS EXAMINATION REPORT

---

Patient name: Asha Gallegos

Date of birth: 22 October 1989 ID number: 8910225012089

Address: 12 Seventh Street, Melville, Johannesburg, 2092

Medical aid: Discovery Health Policy number: DH-4472-2025-GA

Date of examination: 12 February 2026

Attending physician: Dr. Thandiwe Mabaso (MBChB, MMed)

### CLINICAL FINDINGS

Blood pressure: 118/76 mmHg. Within normal range.

Resting pulse: 62 beats per minute. Consistent with regular aerobic activity.

Weight: 64 kg Height: 168 cm BMI: 22.7 (normal range).

### PATHOLOGY RESULTS

Full blood count: all values within normal reference ranges. No anaemia detected.

Fasting cholesterol panel: Total cholesterol 4.2 mmol/L. LDL 2.4 mmol/L. HDL 1.6 mmol/L.  
Triglycerides 0.9 mmol/L. All within target ranges.

Fasting glucose: 4.7 mmol/L. Normal.

Thyroid function (TSH): 1.8 mIU/L. Normal.

Vitamin D: 41 ng/mL. Adequate.

### SUPPLEMENTATION REVIEW

Patient reports current daily supplementation: Vitamin C 1000 mg, B-complex (B12, B6, folate), and magnesium glycinate 300 mg at night. Supplementation is appropriate for the patient's lifestyle and working schedule. No changes recommended.

### VOICE AND THROAT ASSESSMENT

Oral inspection normal. Vocal folds examined indirectly; no nodules, polyps, or inflammation detected. Patient's warm-water and honey pre-show routine and regular vocal coaching are appropriate preventive measures. Continue current practice.

### OVERALL ASSESSMENT

All clear. No clinical concerns identified. Patient is in good health for her age. Aerobic fitness markers are above average, consistent with reported running schedule. Next annual review

recommended for February 2027.

### **NOTES FOR PATIENT**

Continue the current sleep routine. Six to seven hours is adequate but maintaining a consistent wake time on weekends will help preserve the morning schedule. Continue the magnesium at night as it supports sleep quality. Hydration before and during morning broadcasts is important for vocal health.
