Visit Summary and Laboratory Results

Patient: Brian Patterson

Date of birth: December 18, 2004

Address: 412 Euclid Avenue, Apt 2, Syracuse, NY 13210

Phone: (315) 555-0278

Date of visit: January 14, 2026

Provider: Dr. Toyin Adeyemi, Internal Medicine

Reason for visit

Annual wellness check and yearly hemoglobin monitoring for sickle cell trait.

Vitals

Measure	Result	Reference
Blood pressure	118 over 74	Within range
Heart rate	62 bpm	Within range
Weight	168 lb	Stable
Temperature	98.4 F	Within range

Laboratory

Test	Result	Note
Hemoglobin	14.6 g/dL	Within range
Hemoglobin S, sickle cell trait	Confirmed carrier	One copy of the gene, asymptomatic
Ferritin	92 ng/mL	Within range

Assessment and plan

Sickle cell trait, stable and asymptomatic. This is the carrier state and not sickle cell disease. Continue consistent hydration, use proper layers in extreme cold, and keep exercise at moderate intensity. Recheck hemoglobin at the next annual visit. No medication changes.

Tension headaches reported one to two times weekly during heavy study periods. Reviewed sleep, screen time, and caffeine. Continue ibuprofen as needed and return if frequency increases.
