This log records the maintenance and repair work completed at Bethlehem Lutheran Church during the month. Each item is logged by the church secretary when reported and marked complete when the work is finished. The log helps the church track recurring issues and plan for larger repairs.

Logged Work

Date	Task	Status
Jan 06	Furnace filter replacement, fellowship hall	Complete
Jan 09	Repaired dripping faucet, kitchen	Complete
Jan 13	Replaced two hallway light fixtures	Complete
Jan 16	Cleared snow, main and side entrances	Complete
Jan 23	Reset tripped breaker, office wing	Complete
Jan 27	Tightened loose handrail, stairwell	Complete

Notes

January is a heating and snow month, and the log reflects it. The furnace filter was changed on schedule and the entrances were cleared after each storm so that members could come and go safely. The hallway lights had been flickering for a week and were replaced with new bulbs and one new fixture.

Watch List

The kitchen faucet was repaired but the fixture is aging and may need full replacement before the year is out. The stairwell handrail was tightened and should be checked again in spring. No items were left outstanding at the close of the month.

Requests are logged by Barb Kleinsasser, church secretary, and reviewed with Pastor Sorenson as needed.
