Repayment Notes

Early in a ten year term, most of each payment goes to interest, and the principal moves slowly. Grace makes the full payment every month without fail. Until the balance is meaningfully reduced, retirement saving is on hold, even though the firm offers a plan. It is the one piece of the budget she would most like to change and the one that will take the longest.

Grace declined a higher paying private firm offer that would have retired this debt faster, choosing public interest work instead.
