

Annual Physical, Laboratory Results

Comprehensive metabolic and lipid evaluation with cardiovascular screening.

Patient	Jason A. Campbell
Date of birth	November 14, 1974
Collection date	March 6, 2025
Resting heart rate	58 bpm
Blood pressure	118 over 76
Ordering clinician	Adult Primary Care

Laboratory panel

Test	Result	Reference range	Flag
Total cholesterol	172 mg per dL	under 200	Normal
LDL cholesterol	94 mg per dL	under 100	Normal
HDL cholesterol	61 mg per dL	over 40	Normal
Triglycerides	88 mg per dL	under 150	Normal
Fasting glucose	89 mg per dL	70 to 99	Normal
Creatinine	0.95 mg per dL	0.7 to 1.3	Normal
Hemoglobin A1c	5.2 percent	under 5.7	Normal

Clinical summary and plan

Stress test, lipid panel, and metabolic panel are within normal limits. The patient maintains an excellent cardiovascular profile consistent with a disciplined exercise and nutrition routine.

- Continue the current heart healthy diet, running, and supplements.
- Maintain resting heart rate and blood pressure monitoring at home.
- Next annual visit per the regular schedule.

Provider note

No medication changes indicated. Patient counseled on continued preventive measures. Routine follow up in twelve months unless symptoms arise.
