

Continuing Review Approval Notice

Continuation of an approved multi-center research protocol.

Protocol number	CCP-AV-2024-017
Protocol title	Multi-Center Aortic Valve Outcomes Study
Principal investigator	Dr. Jason Campbell
Review type	Continuing review, expedited
Approval date	January 15, 2026
Approval valid through	January 14, 2027

Determination

Dear Dr. Campbell, the Board has completed its continuing review of the above protocol and has approved its continuation. No unanticipated problems involving risks to participants were reported during the prior period, and the approved consent document remains unchanged.

Conditions of approval

- Conduct the study only as approved. Submit amendments before implementing changes.
- Report unanticipated problems and serious adverse events without delay.
- Submit the next continuing review before the expiration date above.

Regulatory file checklist

Document	Status
Approved protocol, current version	On file
Approved consent document	Unchanged
Continuing review report	Accepted
Next review due	Before January 14, 2027

Issued by the Institutional Review Board

Retain this notice with your regulatory file. Continuation is contingent on adherence to the conditions of approval above.
