

COLUMBUS MEDICAL GROUP

LABORATORY REPORT

Lipid Panel and Comprehensive Metabolic Profile

Patient Name:	Jason Robert Kim	Report Date:	January 22, 2026
Date of Birth:	October 20, 1975	Ordering Provider:	Dr. Alan Vasquez, MD
Age:	50	Practice:	Columbus Medical Group
MRN:	CMG-0028471	Address:	1410 S. High Street, Columbus, OH 43207
Phone:	(614) 555-2947	Lab Reference:	CMG-LAB-2026-01-9834

SECTION A LIPID PANEL

Specimen collected: January 22, 2026, 7:38 AM (fasting, 11 hours). Methodology: enzymatic colorimetry.

Test	Result	Reference Range	Units	Flag
Total Cholesterol	211	< 200 desirable	mg/dL	H
LDL Cholesterol (calculated)	138	< 100 optimal	mg/dL	H
HDL Cholesterol	48	> 40 acceptable	mg/dL	
Non-HDL Cholesterol	163	< 130	mg/dL	H
Triglycerides	126	< 150	mg/dL	
Total Chol / HDL Ratio	4.4	< 5.0	ratio	

H = High. LDL remains elevated above the less-than-100 optimal target, consistent with prior results. Patient is currently on atorvastatin 20 mg daily. Dr. Vasquez to discuss potential dose adjustment at next visit.

SECTION B COMPREHENSIVE METABOLIC PANEL

Specimen collected same draw as lipid panel. Methodology: standard colorimetric and enzymatic assays.

Test	Result	Reference Range	Units	Flag
Glucose (fasting)	96	70-99	mg/dL	
BUN (Blood Urea Nitrogen)	17	7-25	mg/dL	
Creatinine	0.92	0.74-1.35	mg/dL	
eGFR	>60	>60	mL per min per 1.73 m2	
Sodium	139	136-145	mEq/L	
Potassium	4.2	3.5-5.1	mEq/L	
Chloride	101	98-107	mEq/L	

Columbus Medical Group Lab Report Jason R. Kim Jan 2026 Page 1

CO2 / Bicarbonate	26	21-31	mEq/L	
Calcium	9.4	8.5-10.5	mg/dL	
Total Protein	7.1	6.3-8.2	g/dL	
Albumin	4.4	3.5-5.0	g/dL	
Total Bilirubin	0.6	0.2-1.2	mg/dL	

ALT (SGPT)	32	7-56	U/L	
AST (SGOT)	28	10-40	U/L	
Alkaline Phosphatase	74	44-147	U/L	

SECTION C PROVIDER NOTES

All metabolic values are within normal limits. Kidney and liver function are normal. Fasting glucose is normal, with no indication of pre-diabetic range. Primary clinical concern remains the LDL cholesterol reading of 138 mg/dL. Patient has been on atorvastatin 20 mg daily since August 2023. Dietary compliance has been partial per the patient own report. Recommendation: increase dietary adherence and consider titrating to atorvastatin 40 mg at next quarterly review. Patient to continue evening walks and reduce red meat intake per prior guidance. Follow-up draw scheduled for approximately 12 weeks out.

Medication reconciliation noted: atorvastatin 20 mg daily, baby aspirin 81 mg daily, multivitamin daily. No adverse drug interactions flagged.

LAB VALUE TREND COMPARISON

Columbus Medical Group Lab Report / Jason Robert Kim / MRN CMG-0028471

Prior results for comparison (Dr. Alan Vasquez, Columbus Medical Group):

Test	Jan 2026	Oct 2025	Jul 2025	Jan 2025	Reference Range	Trend
Total Cholesterol (mg/dL)	211 H	208 H	214 H	219 H	< 200	Improving slowly
LDL Cholesterol (mg/dL)	138 H	135 H	141 H	148 H	< 100	Improving
HDL Cholesterol (mg/dL)	48	46	45	44	> 40	Improving
Triglycerides (mg/dL)	126	131	138	145	< 150	Improving
Total/HDL Ratio	4.4	4.5	4.8	5.0 B	< 5.0	Improving
Glucose fasting (mg/dL)	96	94	98	97	70-99	Stable
Creatinine (mg/dL)	0.92	0.90	0.91	0.93	0.74-1.35	Stable

H = High. B = Borderline high. Atorvastatin 20 mg daily initiated August 2023. Trend shows gradual LDL improvement. Dr. Vasquez to evaluate dose titration at next quarterly visit based on continued dietary compliance.

PATIENT INSTRUCTIONS AND FOLLOW-UP PLAN

Columbus Medical Group Lab Report / Jason Robert Kim / MRN CMG-0028471

Medication Instructions:

Medication	Dose	Timing	Instructions
Atorvastatin (Lipitor)	20 mg	Evening, daily	Take with or without food. Avoid excessive grapefruit juice. Report muscle pain or weakness now
Baby Aspirin	81 mg	Morning, daily	Take with food to reduce GI irritation. Continue unless instructed otherwise.
Multivitamin	Standard adult	Morning	Continue as directed. No known drug interactions at this dose.

Dietary Guidance:

1. Limit red meat to no more than twice per week. Replace with fish (especially salmon, sardines, mackerel) at least twice weekly. 2. Increase soluble fiber: oats, beans, lentils, apples, pears. 3. Reduce saturated fats. Olive oil and avocado in place of butter where feasible. 4. Continue current sodium-moderate intake. 5. Alcohol: current level (moderate, weekends) acceptable. Avoid weekday consumption.

Follow-Up Schedule:

Follow-Up Item	Target Date	Location	Notes
Fasting lipid panel recheck	Approx. 12 weeks from Jan 22, 2026	Columbus Medical Group Lab	Confirm LDL direction; evaluate dose change
Physician visit with Dr. Vasquez	Approx. 12-14 weeks from Jan 22, 2026	Columbus Medical Group	Review lab results; medication review
Annual physical exam	Oct 2026	Columbus Medical Group	Comprehensive exam per age-50 protocol

Insurance BCB-OH-4471092 covers preventive lab services at 100% in-network. See x2.xlsx for insurance premium budget line.

PREVENTIVE CARE SCHEDULE AND ANNUAL HEALTH SUMMARY

Columbus Medical Group / Jason Robert Kim / MRN CMG-0028471

Recommended Preventive Screenings by Age (Age 50 Male):

Screening	Frequency	Last Done	Next Due	Status / Notes
Fasting lipid panel	Every 3 months (per Dr. Vasquez)	Jan 22, 2026	Approx. 12 weeks out	LDL management ongoing
Blood pressure check	Each visit	Jan 22, 2026	Next visit	118/76 at Jan 2026 visit; excellent
Colorectal cancer screening (colonoscopy)	Every 10 years starting at 45	Nov 2024	Nov 2034	Normal; polyp-free per 2024 report
Annual physical exam	Yearly	Oct 2025	Oct 2026	Due for full exam in fall
Vision exam	Every 2 years	Feb 2025	Feb 2027	Mild distance correction; no change
Dental (Columbus Family Dental)	Twice yearly	Oct 2025	Approx. Oct 2026	No cavities; routine cleaning
Skin check (dermatology)	Yearly (recommended for fair-skinned)	Not on record	Recommend scheduled	Dr. Vasquez referral available
Hearing	Every 5 years at age 50+	Not on record	Recommend baseline	Not reported symptoms

Weight and Activity Log (self-reported):

Date	Weight (lbs)	Activity Level	Notes
Jan 2026	214	Moderate	Evening walks resumed after holiday slowdown; 2-3 nights/week
Oct 2025	216	Moderate	Saturday soccer continuing; average 1 walk per week
Jul 2025	218	Low-Moderate	Summer heat reduced walks; Lake Erie trip active
Jan 2025	221	Low	Target weight 195; working toward 1-2 lbs per month

Current weight 214 lbs; target 195 lbs per Dr. Vasquez guidance. Atorvastatin compliance noted as partial per self-report. Patient verbally confirms daily intake but dietary modification inconsistent, particularly regarding red meat reduction. Walking 2-3 evenings per week and Saturday recreational soccer are positive contributors. Insurance BCB-OH-4471092 covers annual physical at no cost in-network.
