

Patient and Visit

Patient	Jason Rivera
Date of birth	January 22, 1979
Visit date	January 14, 2026
Provider	Tarik Osman, MD, Internal Medicine
Location	St. Joseph's Medical Group, 703 Main Street, Paterson, NJ 07503
Reason for visit	Type 2 diabetes and hypertension follow up

Vitals

Measure	Result	Note
Blood pressure	142 / 88 mmHg	Above goal of 130 / 80
Weight	214 lb	Stable
Height	5 ft 10 in	
Body mass index	30.7	Discussed diet and daily walking

Laboratory Results

Test	Result	Reference range	Flag
Hemoglobin A1C	7.4 %	under 5.7 %	High
Fasting glucose	152 mg/dL	70 to 99 mg/dL	High
Total cholesterol	196 mg/dL	under 200 mg/dL	Normal
LDL cholesterol	118 mg/dL	under 100 mg/dL	High
HDL cholesterol	41 mg/dL	over 40 mg/dL	Normal
Creatinine	0.9 mg/dL	0.7 to 1.3 mg/dL	Normal

Assessment and Plan

Type 2 diabetes, not at goal. A1C of 7.4 is above the target of 7.0. We discussed adding a GLP-1 agonist to improve control. The patient prefers to continue the current regimen for now and will reassess at the next visit. Continue Metformin 1000 mg twice daily.

Essential hypertension. Blood pressure remains above the goal of 130 over 80. Continue Amlodipine 5 mg each morning. Reduce sodium and aim for a daily walk after dinner.

Chronic low back pain. Continue ibuprofen as needed and a heating pad. An orthopedic referral was offered and declined at this time.

Current Medications

Medication	Dose	Frequency	Purpose
Metformin	1000 mg	Twice daily	Type 2 diabetes
Amlodipine	5 mg	Each morning	Blood pressure
Ibuprofen	400 mg	As needed	Low back pain

Follow Up

Next office visit	October 20, 2026 at 8:30 AM
Before the visit	Repeat A1C and basic metabolic panel
Bring	Home glucose log and current medication list
