Clinical summary

The patient maintains good home care and brushes twice daily, with flossing improved since the last visit. No restorative work is needed. A vegetarian diet was discussed with no concerns.

Hygiene Plan and Account Summary

Home care plan

Continue brushing twice daily with a soft brush and fluoride paste. Floss nightly, giving extra attention to the lower front teeth where tartar tends to gather. A fluoride rinse a few times a week is optional given the low decay history.

Next recall

The next cleaning is due October 2026 and a reminder will be sent through the patient portal. Preventive visits at this interval are fully covered, so the expected patient cost is zero.

Account summary
