

Sonoran Skin Health

Visit Summary | Confidential patient record

Patient	Jessica Anne Spencer
Date of birth	December 8, 1982
Visit date	February 11, 2026
Visit type	Routine skin check, every six months

Findings

Full skin examination completed. No suspicious lesions noted. Skin is healthy with expected sun exposure changes for the region. One benign spot on the left forearm was photographed for routine monitoring, no action needed at this time.

Plan

- Continue daily broad spectrum sun protection, reapply during outdoor activity.
- Continue vitamin D at 5000 IU daily as previously recommended.
- Annual review of any changing spots, monitor and report.
- Next routine skin check in six months, scheduled for January 2027.

This summary is provided for the patient's records and is not a substitute for in person care.
