Supervisor Narrative

Jordan continues to develop into a dependable finish carpenter. Over the last review period he handled solo trim and cabinet work on a kitchen renovation in Wake Forest and supported a deck build in Apex. He works clean, asks good questions instead of guessing, and keeps his area in order.

His finish and trim ratings reflect the work he has been trusted with this year. He reads layout well and his joinery is tight. The areas to keep building are speed on production framing and confidence quoting his own material takeoffs, both of which come with hours.

He is on track to complete the program and earn journeyman status in 2027 at his current pace. The next formal review is scheduled for the start of Year 4. No attendance or conduct concerns are on file.

Expected completion: April 2027.

Program Standards and Apprentice Acknowledgement

The registered apprenticeship combines paid on the job learning with related classroom instruction. The apprentice agrees to maintain satisfactory progress in both, to follow all jobsite safety rules, and to keep an accurate record of hours worked and instruction completed.

The sponsor agrees to provide a safe worksite, qualified supervision, and the range of work processes needed to build full trade competency. Wage steps advance as documented hour milestones are reached.

Records are reviewed at each level. A copy of this report is kept by the sponsor and filed with the state apprenticeship office under the registration number shown above. Questions about progress should be directed to the supervisor of record.
