Appointment Confirmation and Visit Preparation

Patient Juan Carlos Hernandez
Date of birth March 15, 1954
Chart CEA-10394
Provider Alan Pierce, OD
Appointment October 15, 2026 at 2:30 PM

Dear Mr. Hernandez,

This letter confirms your annual comprehensive eye examination with a progressive lens review. We plan to dilate the eyes during the visit. Your vision will be blurry for two to three hours afterward, so a driver is recommended. If driving alone is not advisable, please arrange a ride home in advance.

What to bring

- Your current progressive glasses.
- A current medication list.
- The vision rider card from the Medigap plan.
- A short list of any concerns, especially night driving glare.

Prescription on file from your last visit

Measure	Right eye	Left eye
Sphere	-1.75	-2.00
Cylinder	-0.50	-0.75
Add power	+2.25	+2.25
Pressure	15 mmHg	16 mmHg

Notes from the prior exam

Mild early cataract changes were noted at the prior annual exam and are being monitored. No intervention is needed at this time. Please bring any concerns about night driving glare to the visit so we can discuss lens coatings that reduce halos.

Preparing for dilation

- Dilating drops widen the pupil so the retina can be examined. The effect lasts a few hours.
- Bring sunglasses for the ride home; bright light will be uncomfortable.
- Reading and screen work will be difficult until the drops wear off. Plan a light afternoon.
- If you have ever had a sharp pressure rise after dilation, tell the technician before the drops are given.

Rescheduling

If you need to change this appointment, please call at least one business day ahead so the slot can be offered to another patient. The next annual exam will be scheduled before you leave the office.

We look forward to seeing you on October 15.

Sincerely,

The scheduling team, Chesapeake Eye Associates
