Patient:	Marcus J. Rivera Jr.	Date of Visit:	February 18, 2026
Date of Birth:	May 23, 2013	Age at Visit:	12 years
Sex:	Male	Provider:	Rachel Alston, MD
Guardian Present:	Justin M. Rivera (father)	Visit Type:	Annual well child

MEASUREMENTS

Measure	Result	Percentile
Height	5 ft 2 in (62 in)	60th
Weight	105 lb	55th
Body Mass Index	19.2	52nd
Blood Pressure	108 / 68 mmHg	Normal
Vision	20/20 both eyes	Normal
Hearing	Pass, both ears	Normal

ASSESSMENT

Healthy 12 year old male, developmentally appropriate and meeting expected milestones. Active in baseball through the school year. Growth trajectory is consistent with prior visits and there are no acute concerns. Immunizations are up to date. A Tdap booster was administered at today's visit. Sports nutrition and hydration were discussed with the patient and parent in the context of the upcoming season.

HARTFORD PEDIATRIC ASSOCIATES - Visit Summary (continued)

IMMUNIZATION RECORD

Vaccine	Date	Status
Tdap (Tetanus, Diphtheria, Pertussis)	February 18, 2026	Administered today
Influenza (seasonal)	October 2025	Up to date
HPV (series, dose 1)	February 18, 2026	Initiated
MMR, DTaP, Polio, Varicella (childhood series)	Complete	Up to date

RECOMMENDATIONS

- Continue current activity level and balanced diet; limit sugary drinks.
- Apply sunscreen during outdoor sports and stay hydrated at practices and games.
- Begin HPV series follow-up dose in six months.
- Schedule a routine dental visit within six months.
- Return for the next well child visit in one year.

ANTICIPATORY GUIDANCE

Topics reviewed for this age group included safe screen time, sleep needs of approximately nine to eleven hours, helmet use for biking, and open communication with parents. The patient asks thoughtful questions and is engaged in his own care.

Next appointment: February 2027.

Electronically signed by Rachel Alston, MD, on February 18, 2026.
