

Health Check Summary

Annual check-up

Higashiyama Clinic

Dr. Kenji Nakamura

12 Feb 2026

Patient Margaret Farmer, DOB 22 Sep 1994
Visit Annual check-up, 12 February 2026
Overall All clear. No concerns. See you next February.

Findings

Item	Result	Note
Blood pressure	Normal	118 over 74
Bloods	Normal range	Iron a little low end, keep up the diet
Bone density	Good	Keep the calcium and the winter vitamin D
Weight	Stable	No change from last year
Shoulder and wrist	Managed	Under Dr. Fujimoto, physio. Not a clinic matter unless numbness
Sleep	Adequate	Reports 7 to 8 hours, reads before bed

Advice

- Calcium supplement and winter vitamin D, continue, both still recommended for bone health.
- Iron at the low end of normal. Not anaemia. The grilled fish and the greens are doing the work, keep them up.
- Dust: you wear the mask for glaze mixing, keep doing it without fail. The lungs are clear, keep them that way.
- Stress: the autumn looks heavy. Sleep and the morning walk are not optional in a busy season, they are the medicine.

Dentist is separate, Dr. Harada at Gion Dental, six monthly, next due spring. Physio shoulder care under Kyoto Body Works.
