Resting heart rate	48 bpm	Athletic, normal
Height / Weight	6 ft 1 in / 182 lb	BMI 24.0
Temperature	98.4 F	Normal

Cardiac and Laboratory

Test	Result	Reference
12 lead EKG	Normal sinus rhythm, no abnormality	Normal
Total cholesterol	172 mg/dL	Below 200
LDL	98 mg/dL	Below 100
HDL	61 mg/dL	Above 40
Triglycerides	84 mg/dL	Below 150
Fasting glucose	88 mg/dL	70 to 99

Assessment and Plan

Patient is a 31 year old endurance runner in excellent health. Family history is notable for paternal myocardial infarction at age 61, so we continue annual EKG and lipid surveillance. Cardiac workup today is reassuring. Mild left patellar tendinopathy is self managed with eccentric loading and is stable. Continue current training. Return in one year, sooner if any chest symptoms with exertion.

Electronically signed by Marcus Grant, MD on November 18, 2025.
