

Welding Certification Cohort - October 2026 Syllabus

Program Overview

This is a rolling sixteen-week certification program for adults aged eighteen to thirty. Class meets Monday through Thursday, eight in the morning until three in the afternoon, with Fridays reserved for planning and make-up shop hours.

Weeks 1-4: Foundations

Shop safety, blueprint reading, metallurgy basics, and oxy-fuel cutting. Students earn their safety sign-off before touching a welder.

Weeks 5-9: SMAW and GMAW

Stick welding in flat and horizontal positions, then migrating to gas metal arc welding. Daily bead practice and destructive testing of coupons.

Weeks 10-14: Position Welding

Vertical and overhead positions, pipe fit-up, and joint preparation. Students build a portfolio of qualified coupons.

Weeks 15-16: Certification

Practice plates, the certification weld test, and job-placement preparation. Graduates leave with an industry-recognized credential and a placement file.
