

Hartford Heart Associates

Visit Summary

85 Seymour Street, Suite 600, Hartford, CT 06106 | (860) 555-0600

Patient: Jenny Eleanor Wilkins | DOB: 03/15/1956

Provider: Dr. Martin Costello, MD, FACC

Date of visit: February 10, 2026 | Visit type: Annual cardiac evaluation

Vitals

Blood Pressure	Heart Rate	Weight	BMI
132 / 78 mmHg	66 bpm	148 lb	24.6

Assessment

Hypertension, well controlled on amlodipine 5 mg daily. Resting EKG normal sinus rhythm with no acute changes. No chest pain, palpitations, or exertional symptoms reported. GERD-related chest discomfort discussed and felt to be noncardiac, consistent with the gastroenterology picture managed by primary care.

Plan

Continue amlodipine 5 mg each morning. Continue the daily 30-minute walk and home blood pressure log. No change to medication. Lipid panel reviewed from primary care, LDL marginally elevated, managing with diet given NSAID avoidance. Return in approximately ten months for the next annual review, scheduled December 17, 2026. Contact the office sooner for any new chest pain, shortness of breath, or fainting. This summary is informational; direct clinical questions to Dr. Costello's office.
