After Visit Summary   Confidential patient record

Patient: Meghan Yuki Douglas

Visit date: November 12, 2026

Reason: 6 month thyroid follow up

DOB: 03/14/1999

Provider: Dr. Lani Akana, MD

Next review: May 2027

## Current medications

- Levothyroxine 75 mcg tablet, one by mouth each morning on an empty stomach, 30 minutes before food
- Vitamin D3 2000 IU daily
- Selenium 200 mcg daily
- Calcium supplement to be taken at least 4 hours apart from levothyroxine

## Laboratory results

| Test             | Result     | Reference range | Flag   |
|------------------|------------|-----------------|--------|
| TSH              | 2.10 mIU/L | 0.40 to 4.50    | Normal |
| Free T4          | 1.20 ng/dL | 0.80 to 1.80    | Normal |
| Vitamin D, 25-OH | 41 ng/mL   | 30 to 100       | Normal |

Assessment: Hypothyroidism, autoimmune, well controlled on current dose. Continue present regimen. Recheck thyroid panel in 6 months. Keep calcium and the morning levothyroxine separated by at least 4 hours. Patient declined any change to supplements. Last panel was January 2026, stable since.
