RECOMMENDATIONS

1. Cull #3905 (open second cycle) and #3878 (12-yr, dental) at October sale.
2. Recheck #6178 and #6183 horn-rub wounds the morning of October 14 before loading.
3. Consider holding #6209 (small-frame steer, 410 lb) for January feeder run rather than the October 20 auction. Weight gain through November could add \$180-\$220.
4. Nine replacement heifers identified by client are in good condition for holdback.
5. No booster vaccinations required before October 14 weaning day.
6. South pasture coyote breach (June 29 loss) should be repaired before winter.

Next scheduled visit: October 14, 2026 (weaning day assistance, 06:30-15:00).

Carl Perkins confirmed for chute assistance.

Respectfully submitted,
