Sale Day Market Report

October 5, 2026

100 S Manhattan St, Amarillo, TX 79106

Phone: (806) 555-0600 | Commission: 3%

MARKET SUMMARY

Total head sold: 847

Receipts: 912 head consigned, 847 sold, 65 no-sale or passed

Market tone: Steady to firm on lightweight calves, steady on yearlings,
cull cows and bulls steady to \$2 higher.

Buyer demand was solid across all classes with strong regional interest from feedlot operators in the northern Panhandle and western Oklahoma. Lightweight steers (450-525 lb) traded at the upper end of recent ranges. Feeder heifers held firm. Cull cows saw improved demand from packers, likely driven by tight national cow inventory.

Weather outlook: Panhandle drought conditions (D2-D3) are pushing some producers to market earlier, adding to receipts. However, quality remains high and buyers are rewarding preconditioned, vaccinated calves.

Next sale: October 20, 2026. Consignment deadline: October 18, 2026.

Check-in time: 07:00 AM. Sale starts: 10:00 AM.

REGIONAL MARKET COMMENTARY

PANHANDLE CONDITIONS

Drought conditions across the Texas Panhandle continue to trend from D2 (severe) toward D3 (extreme) in Wheeler, Donley, Hall, and Briscoe counties. The US Drought Monitor issued October 1 shows no improvement since September. Pasture conditions are rated 68% poor to very poor across the region.

Hay prices have climbed steadily since April. Wheeler County Hay Co. reports round bale prices at \$75 per bale in September, up from \$39 in April. November forward pricing is expected at \$78-\$82 per bale.

The combination of tight pasture and rising hay costs is prompting some producers to wean and sell earlier than planned. This has added to receipts at Amarillo and the regional barns, but the national inventory remains tight enough that prices have held firm.

CONSIGNMENT NOTES FOR OCTOBER 20 SALE

- Consignment deadline: October 18, 2026
- Check-in: 07:00 AM at the main unloading chute
- Sale order: calves first, yearlings, bred cows, cull cows/bulls
- Commission: 3% of gross
- Hauling: seller responsibility
- Health papers: required for out-of-state buyers
- Preconditioned calves with vaccination records receive premium bidding

Producers with vaccinated, weaned calves in the 500-575 lb range should expect strong interest from feedlot buyers. Dr. Moyer's vaccination certification paperwork at the sale ring continues to add value.

NATIONAL OUTLOOK

USDA Cattle on Feed report (September 2026) showed placements down 4% year-over-year. Total cattle on feed at 11.1 million head, down 2%. The tight supply environment supports prices through Q4 2026 and into Q1 2027. Feeder cattle futures (CME) are trading \$2.42-\$2.58 for the November contract as of October 3.

Seasonal price weakness typically begins in late November as the fall run peaks. Producers marketing in the October 20 window are positioned ahead of the seasonal downturn.
