Clinical Laboratory Report

PATIENT

Courtney Harper
DOB: 1986-01-18
Sex: F

ORDERING PROVIDER

Anita Patel, MD
Primary Care - Internal Medicine
Provider phone: 937-555-0700

COLLECTION

Collection Date: 2026-02-14
Fasting: Yes
Accession: (on file)

REPORT

Report Date: 2026-02-15
Specimen: Venous whole blood
Method: HPLC / NGSP-certified

RESULTS

Test	Result	Units	Reference Range	Flag
Hemoglobin A1C	6.8	%	4.0 - 5.6 (non-diabetic) < 7.0 (diabetic goal)	H

INTERPRETATION

HbA1C of 6.8% represents improved glycemic control compared with the 7.3% recorded at diagnosis in 2023. Result meets the individualized target of less than 7.0% for this patient. Continue current management. No medication change recommended at this time.

PLAN

- Continue metformin 500 mg by mouth twice daily with meals.
- Reinforce dietary and exercise counseling; fasting glucose target 80 to 130 mg/dL.
- Recheck HbA1C in approximately nine months.
- Next HbA1C due: 2026-11-13. Fasting labs required.
- Patient to review results in the provider portal and message with any questions.

NOTES

Reference ranges are laboratory standards for HbA1C reporting. Diagnostic thresholds: below 5.7% is non-diabetic, 5.7 to 6.4% is prediabetes, at or above 6.5% is consistent with diabetes. Individualized treatment target for this patient is less than 7.0% per ordering provider.
