A1c	5.4 percent	Normal
Vitamin D	38, adequate	On D3 supplement

Full medication list is maintained in D02 and xm3. Costs tracked in t2.

Plan and follow up

Continue current medications. Repeat DEXA scan scheduled for November 13, 2026 to monitor osteopenia.

Continue calcium 600 mg with vitamin D3 2000 IU daily. Keep up low-impact exercise.

Next annual physical in January 2027. Call the office with any new symptoms.
