Height:	166 cm
BMI:	23.0 kg/m ² (Normal range)
Oxygen Saturation:	99% on room air

Investigations Ordered and Results

Full Blood Count: All parameters within normal reference ranges. Haemoglobin 13.2 g/dL.

Fasting Blood Glucose: 4.7 mmol/L (Normal, non-diabetic range).

Lipid Profile: Total cholesterol 4.3 mmol/L, LDL 2.6 mmol/L, HDL 1.4 mmol/L, Triglycerides 1.1 mmol/L. All within acceptable limits.

Liver Function Tests: Normal. ALT 22 U/L, AST 19 U/L.

Renal Function Tests: Urea 4.8 mmol/L, Creatinine 72 umol/L. Normal.

Thyroid Function (TSH): 2.1 mIU/L (Normal range).

Urinalysis: No protein, no glucose, no blood detected. Microscopy clear.

Cervical Smear (Pap Smear): Adequate sample. Result: NILM (Negative for Intraepithelial Lesion or Malignancy). Next due February 2029.

Clinical Assessment and Recommendations

Dr. McBride presents in good general health. No acute complaints beyond occasional tension headaches, which she reports managing effectively with hydration, rest, and her consistent yoga and walking routine.

Physical examination unremarkable. Cardiovascular, respiratory, and abdominal systems all normal on examination.

Recommendations:

1. Continue current wellness routine: daily morning walks and three yoga sessions per week are commended.
2. Maintain adequate hydration, particularly on field work days in Udi LGA when environmental exposure is prolonged.
3. Tension headaches: no pharmacological intervention warranted at this stage. If frequency increases, return for further assessment.
4. Reviewed vitamin D supplementation: levels borderline at 28 nmol/L. Advised 1000 IU daily supplement and increased sunlight exposure.
5. Next annual check: February 2027.

No referrals indicated.
