Vitals

Measure

Result

Blood Pressure: 116/74 mmHg

Heart Rate: 68 bpm

Temperature: 98.4 F

BMI: 22.6

Assessment: Healthy 24-year-old presenting for routine annual physical. No acute concerns. No chronic conditions. Patient reports adequate diet, inconsistent exercise, and 6 to 7 hours of sleep per night. Discussed sleep hygiene and stress related to work demands.

Plan and Recommendations

Continue daily multivitamin. Occasional melatonin for sleep is acceptable. Aim for consistent physical activity and a regular sleep schedule. Lab panel ordered (CBC, lipid, metabolic); all results within normal range. No prescriptions issued. Return for next annual wellness visit in February 2027 or sooner if symptoms arise.

Next Appointment: Recommended: routine physical, February 2027. Schedule by phone at (404) 555-0519 or through the patient
