SCHEDULING NOTES:

- Must be completed at least 7 days before appointment
- Patient appointment: October 23, 2026, 3:00 PM
- Bloodwork deadline: October 16, 2026
- Preferred morning draw (patient takes levothyroxine 88mcg daily, morning dose should be held until after the blood draw to avoid affecting TSH results)

PREVIOUS RESULTS (April 15, 2026):

TSH: 2.8 mIU/L (Reference: 0.4-4.0 mIU/L) - Normal
Free T4: 1.2 ng/dL (Reference: 0.8-1.8 ng/dL) - Normal
CBC: Within normal limits
CMP: Within normal limits

DIAGNOSIS:

E03.9 - Hypothyroidism, unspecified
Monitoring on levothyroxine 88mcg daily

CLINICAL NOTES:

Patient has been on stable levothyroxine dose since 2020.
TSH has been consistently in range (2.4-3.1) over the past 3 years. No dosage adjustment anticipated unless results fall outside reference range. Patient reports

stable energy levels with mild winter dips consistent with seasonal pattern. Next endocrinology visit after this one targeted for December 2026.
