SEP-IRA contribution (\$8,400 YTD as of Sep 30) is an ABOVE-THE-LINE adjustment on Form 1040 Schedule 1, NOT a Schedule C expense, and is intentionally excluded from the expense table above. See Section 4 SEP-IRA worksheet for the contribution schedule and Q4 catch-up calculation.

Section 3: Q4 2026 estimated tax projection (3 scenarios)

Period	Conservative gross	Base gross	Optimistic gross	Notes
Oct 2026	\$7,400	\$8,200	\$9,400	Estrela + Oatly + Tangerine + Praxa Q4 if signed
Nov 2026	\$8,200	\$9,500	\$11,800	Cookbook M3 capture + Praxa shoot day + Edgewater pilot
Dec 2026	\$6,200	\$7,200	\$8,800	Year-end quiet, Hudson Yards studio holiday closure
Q4 gross	\$21,800	\$24,900	\$30,000	Range spans Praxa + Oatly uplift confirmations
Q4 expenses	\$16,200	\$17,400	\$19,800	Variable assistant + studio + cookbook food-stylist

Annual federal total	\$18,200	\$20,400	\$23,800	Q1-Q4 sum of estimated payments

BASE scenario assumes: Oatly Q4 uplift signed (+\$1,800/mo Nov-Dec, +\$3,600), Praxa kickoff results in signed contract within 2 weeks of Oct 12 (\$7,450 first tranche), Salt+Press M3 capture lands on Nov 15 (\$4,000), no Edgewater income in Q4 (pitch decision lands in Dec at earliest).

CONSERVATIVE scenario assumes: Oatly uplift NOT signed, Praxa first tranche partial-only, Salt+Press M3 slips to Dec.

OPTIMISTIC scenario assumes: Oatly uplift signed AND additional Q4 paid-media add-on, Praxa first tranche full, Edgewater pilot day billed in Nov.

Section 4: SEP-IRA contribution worksheet

Month	Monthly contribution	YTD contribution	Notes
Jan 2026	\$933.33	\$933.33	Monthly auto-transfer to Fidelity SEP-IRA xxx-4471
Feb 2026	\$933.33	\$1,866.66	
Mar 2026	\$933.33	\$2,799.99	
Apr 2026	\$933.33	\$3,733.32	Q1 contribution complete
May 2026	\$933.33	\$4,666.65	
Jun 2026	\$933.33	\$5,599.98	
Jul 2026	\$933.34	\$6,533.32	Q2 contribution complete
Aug 2026	\$933.34	\$7,466.66	
Sep 2026	\$933.34	\$8,400.00	Q3 contribution complete
Oct 2026 (planned)	\$933.34	\$9,333.34	
Nov 2026 (planned)	\$933.34	\$10,266.68	
Dec 2026 (planned)	\$933.34	\$11,200.02	Annual target before catch-up

Monthly contribution is set at \$933.33 to land \$11,200 annual target by Dec 31, 2026. IRS 2026 SEP-IRA limit is 25 percent of net self-employment earnings or \$69,000, whichever is lower. Projected 2026 net SE earnings (\$25-27K) imply a max contribution of roughly \$5,000-\$5,400 (after the 92.35 percent SE-tax haircut and the effective 20 percent SEP rate on net earnings). Current contribution schedule EXCEEDS the deductible cap; the excess will be reclassified as a NONDEDUCTIBLE personal contribution at Jan packet. Recommend pausing the auto-transfer at Sep 30 (\$8,400 YTD) to avoid further excess. Decision item 3 below.

Alternatives discussed Q2 sync: switch to Solo 401(k) which has higher elective deferral cap (\$23,000 in 2026 plus profit-sharing) and would let Jesse contribute the full \$11,200 deductibly. Switch requires plan setup before Dec 31 to count for 2026 tax year. Decision item 8 below.

Stripe Connected Account	\$15,300 (paid out)	\$570 (fees)	\$14,730	\$5,400 (pending)	\$5,400 in pending_payout per live account

Stripe pending balance of \$5,400 corresponds to the 3 pending-payout charges (ch_3QZ8tF2Lp7nXa01k Tangerine \$2,100, ch_3QZ8uG3Mq8oYa02l Estrela \$1,800, ch_3QZ8vH4Nr9pZa03m Salt+Press cookbook progress \$1,500). These are recorded as Q3 income on accrual basis (correct) but cash has not landed in Chase Business. The /v1/account live setting shows 2-day delay for risk tier 2; these specific charges are held beyond standard delay (Stripe risk review). Recommend client contact Stripe support directly to resolve release timing.

Section 7: YTD mileage and home office summary

Category	Q1 miles	Q2 miles	Q3 miles	YTD miles	Q3 deduction at \$0.70/mi
Shoot-day local (NYC 5 boroughs)	180	220	245	645	\$171.50

Q3 mileage TOTAL			440		\$308.00

Home office deduction (Form 8829): 240 sq ft dedicated home office in 1,950 sq ft Williamsburg unit = 12.3 percent business use. Q3 utilities allocation \$285 included in expense table Section 2. Annual safe-harbor option ($\$5/\text{sq ft} \times 240 = \$1,200$) yields lower deduction; client elects actual-cost method.
