Quarterly Visit Summary - Q2 2026

Patient: Edward W. Byrd
DOB: March 18, 1966
Visit Date: June 24, 2026
Provider: Martha Perkins, MD, FACE
Visit Type: Quarterly Diabetes Management

Current Medications:

- Metformin 1000mg twice daily (breakfast and dinner)
- Amlodipine 5mg once daily (morning)
- Atorvastatin 20mg once daily (evening) - added Q1 2026
- Aspirin 81mg once daily

Lab Results (drawn June 20, 2026):

Test	Result	Reference Range	Flag
HbA1c	7.1%	<7.0%	Slightly High
Fasting Glucose	132 mg/dL	70-100 mg/dL	High
Total Cholesterol	198 mg/dL	<200 mg/dL	Normal
LDL Cholesterol	118 mg/dL	<100 mg/dL	Borderline
HDL Cholesterol	44 mg/dL	>40 mg/dL	Normal
Triglycerides	168 mg/dL	<150 mg/dL	Slightly High
Creatinine	1.0 mg/dL	0.7-1.3 mg/dL	Normal
eGFR	>60 mL/min	>60 mL/min	Normal
TSH	2.4 mIU/L	0.4-4.0 mIU/L	Normal
Blood Pressure	138/86 mmHg	<130/80 mmHg	Elevated
Weight	222 lbs	--	Up 3 lbs from Q1

Assessment & Plan:

1. Type 2 Diabetes - A1c improved from 7.4% to 7.1%. Continue metformin. Patient reports improved dietary compliance, particularly reducing evening carbohydrates. Encourage continued morning walks (currently 30 min 5x/week).
2. Hypertension - BP slightly above target. Continue amlodipine 5mg. If BP remains >135/85 at next visit, consider increasing to 10mg. Patient reports home BP readings averaging 132/84.
3. Hyperlipidemia - LDL borderline on atorvastatin 20mg started Q1. Recheck lipids Q3. Triglycerides elevated, likely dietary. Discussed reducing fried foods and sugary beverages.
4. Weight Management - Up 3 lbs. Patient attributes to summer BBQ season. Set goal of 218 lbs by Q3 visit. Discussed portion control strategies.
5. Right Knee Osteoarthritis - Stable, managing with OTC NSAIDs as needed. Referred to PT if worsens. Walking is beneficial, advise low-impact alternatives on flare days.

6. General - Annual dilated eye exam due October 2026. Annual foot exam completed today, normal monofilament and pulse.

Next Visit: September 23, 2026 (Q3)
