

RIVER CITY FAMILY MEDICINE

Visit Summary -- Annual Physical Examination

Provider: Alan Trask, MD

Practice: River City Family Medicine

Address: 4100 Dominion Boulevard, Suite 210, Richmond, VA 23060

Phone: 804-555-0715

Date of Visit: October 14, 2025

Visit Type: Annual preventive physical (well-adult)

PATIENT INFORMATION

Name: Aiden James McCarthy

Date of Birth: October 14, 1991 | Age at Visit: 34 (birthday today)

Sex: Male

Address: 2314 Venable Street, Apt. 2B, Richmond, VA 23223

Phone: 804-555-0147

Email: aiden.j.mccarthy@gmail.com

Insurance: Anthem BCBS Virginia, Group 22914-TDG

Member ID: WMB-22914-0441A

Emergency: Nathaniel McCarthy (husband), 804-555-0231

VITALS

Blood Pressure:	118 / 74 mmHg	Weight: 164 lbs
Heart Rate:	62 bpm (resting)	Height: 5 ft 10 in
Respiratory Rate:	16 breaths/min	BMI: 23.5 (normal)
Temperature:	98.4 F	O2 Sat: 99% (room air)

REASON FOR VISIT

Annual preventive physical. No acute complaints. Chronic condition: celiac disease (diagnosed 2017, diet-controlled, managed by Dr. Rina Chaudhary at James River Gastroenterology). Patient self-describes health as good. Reports running three days per week and home yoga twice per week. Works in a physically demanding environment (commercial bakery, early morning hours). Notes occasional fatigue during busy production periods -- attributes this to schedule and workload, not illness.

MEDICAL HISTORY

Active conditions:

- Celiac disease (ICD-10 K90.0) -- diet-controlled, specialist-managed
- Iron-deficiency tendency secondary to celiac (resolved on current supplementation protocol)

Past surgical history: None

Hospitalizations: None

Allergies: No known drug allergies. Dietary: gluten (celiac)

Family history:

Mother (Deb Paulson, 58): Hypertension, managed. No diabetes, no cardiac events.

Paternal history: Unknown (minimal contact)

Spouse (Nathaniel McCarthy): No known heritable conditions

CURRENT MEDICATIONS AND SUPPLEMENTS

Vitamin D3 2000 IU daily (celiac malabsorption)

Iron (ferrous sulfate 65 mg) daily with Vitamin C (celiac iron support)

Calcium citrate 500 mg daily (celiac calcium support)

Vitamin C 250 mg daily (taken with iron)

No prescription medications.

REVIEW OF SYSTEMS

Constitutional: No fever, chills, unintentional weight change. Some fatigue during October-November bakery peak season, consistent with prior years.

Cardiovascular: No chest pain, palpitations, dyspnea on exertion. Runs regularly without symptoms.

Respiratory: No cough, shortness of breath.

Gastrointestinal: Managed celiac. Three documented flares in 2025. Reports strict dietary adherence. No ongoing GI symptoms at visit.

Musculoskeletal: Occasional lower back stiffness after long baking shifts (standing 8-10 hours). No acute injury. Yoga practice helps.

Neurological: No headaches, dizziness. Brain fog during celiac flares only.

Psychiatric: Denies depression or anxiety. High occupational stress Nov-Dec. PHQ-9 score 3 (minimal). No current clinical concern.

PHYSICAL EXAMINATION

General: Alert, oriented, in no distress. Appears stated age and healthy.

Cardiovascular: Regular rate and rhythm. No murmurs, rubs, or gallops.

Respiratory: Clear to auscultation bilaterally. No wheezes or crackles.

Abdomen: Soft, non-tender, non-distended. Normal bowel sounds.

Musculoskeletal: Full range of motion. Mild paraspinal tension in lower lumbar region -- consistent with postural strain from occupational standing.

Neurological: Grossly intact. Cranial nerves II-XII intact.

ASSESSMENT AND PLAN

1. Celiac disease -- stable.

Referred to Dr. Chaudhary (James River Gastroenterology) for annual January 2026 visit. Labs ordered through that practice. No primary care action needed.

2. Preventive health maintenance.

BMI normal. BP optimal. Resting HR 62 consistent with regular aerobic exercise.

Cardiovascular and respiratory exam normal. Continue current exercise routine.

3. Occupational musculoskeletal strain.

Mild lumbar stiffness from bakery work. Discussed ergonomic adjustments (anti-fatigue mat at mixing station, periodic stretching during shifts). Yoga practice is beneficial. No imaging or referral at this time.

4. Mental health screening.

PHQ-9 score 3 (minimal). Discussed November-December burnout pattern. Adequate support from spouse and close friend. No intervention indicated. Encouraged therapy as a proactive resource, not a response to crisis.

5. Preventive care completed today.

Influenza vaccine: administered (left deltoid, quadrivalent inactivated).

COVID-19 booster: patient current. Colorectal screening: not indicated until age 45 (October 2036). Skin cancer screening: low risk, self-check discussed.

Labs ordered (routine preventive): CMP, CBC, fasting lipid panel, fasting glucose, TSH. All results within normal limits. LDL 98 mg/dL, HDL 58 mg/dL, TG 82 mg/dL. TSH 1.9 mIU/L.

FOLLOW-UP

Next annual physical: October 2026

GI specialist (Dr. Chaudhary): January 2026

Dentist (Dr. Vey, Shockoe Dental): next cleaning confirmed

Signed: Alan Trask, MD
