

QUEST DIAGNOSTICS

Laboratory Results Report

Ordering Physician: Rina Chaudhary, MD

Practice: James River Gastroenterology

1401 Johnston Willis Drive, Suite 200, Richmond, VA 23235

Patient Name: Aiden James McCarthy

Date of Birth: October 14, 1991

Patient ID: QD-RVA-204918

Collection Date: January 8, 2026

Report Date: January 10, 2026

CELIAC DISEASE PANEL

Test	Result	Units	Ref Range	Flag
tTG-IgA (Anti-tissue Transglutaminase IgA)	4.2	U/mL	0.0 to 3.9	H (Borderline)
Total IgA	148	mg/dL	70 to 400	Normal
Endomysial Antibody (EMA-IgA)	Neg	--	Negative	Normal

Interpretation: Result of 4.2 U/mL is weakly positive (borderline). In the context of a confirmed celiac diagnosis with strict dietary adherence, this is expected to reflect low-level exposure or natural antibody variation. Repeat in 12 months unless symptoms worsen.

IRON STUDIES

Test	Result	Units	Ref Range	Flag
Serum Iron	82	mcg/dL	60 to 170	Normal
TIBC	312	mcg/dL	250 to 370	Normal
Transferrin Saturation	26%	--	20 to 50%	Normal
Ferritin	34	ng/mL	24 to 336	Normal

Interpretation: Iron stores within normal limits. Current supplementation (65 mg ferrous sulfate daily) appears effective. No change recommended.

VITAMIN D

Test	Result	Units	Ref Range	Flag
25-OH Vitamin D	38	ng/mL	30 to 100	Normal (lower end)

Interpretation: Sufficient but trending lower. Current 2000 IU/day is maintaining adequate levels. Consider increasing to 3000 IU given winter season and celiac-related malabsorption history.

VITAMIN B12

Test	Result	Units	Ref Range	Flag
------	--------	-------	-----------	------

Vitamin B12	394	pg/mL	200 to 900	Normal
-------------	-----	-------	------------	--------

COMPLETE METABOLIC PANEL

Test	Result	Units	Ref Range	Flag
Glucose (fasting)	88	mg/dL	70 to 100	Normal
BUN	14	mg/dL	7 to 25	Normal
Creatinine	0.92	mg/dL	0.74 to 1.35	Normal
eGFR	>90	mL/min	>=60	Normal
Sodium	141	mEq/L	136 to 145	Normal
Potassium	4.1	mEq/L	3.5 to 5.1	Normal
ALT (liver)	22	U/L	7 to 56	Normal
AST (liver)	19	U/L	10 to 40	Normal
Total Protein	7.2	g/dL	6.3 to 8.2	Normal
Albumin	4.5	g/dL	3.5 to 5.0	Normal

COMPLETE BLOOD COUNT

Test	Result	Units	Ref Range	Flag
WBC	6.4	K/uL	3.5 to 10.5	Normal
RBC	5.1	M/uL	4.5 to 5.9	Normal
Hemoglobin	15.2	g/dL	13.5 to 17.5	Normal
Hematocrit	44.8%	--	41 to 53%	Normal
MCV	87.8	fL	80 to 100	Normal
Platelets	228	K/uL	150 to 400	Normal

SUMMARY

Results largely within normal reference ranges. tTG-IgA borderline at 4.2 -- close dietary review recommended at annual appointment. Iron and B12 adequate on current protocol. Vitamin D at lower end of sufficiency; dose increase discussion recommended.
