LDL cholesterol	138 mg/dL	under 100	High
HDL cholesterol	48 mg/dL	over 40	Normal
Triglycerides	140 mg/dL	under 150	Normal
Fasting glucose	96 mg/dL	70 to 99	Normal
Hemoglobin A1c	5.4 %	under 5.7	Normal

Assessment and Plan

Borderline elevated total and LDL cholesterol. Continue on the watch plan, no medication at this time. Reduce saturated fat where practical and keep up the daily walking. Recheck the lipid panel at your annual physical in January 2027.

Current daily supplements noted and appropriate: low dose aspirin (precautionary, given family cardiac history), glucosamine for the knees, calcium with vitamin D.

Mild knee osteoarthritis, managed conservatively with ongoing chiropractic care. No new complaints.

This summary is for the patient record. Questions may be directed to the office during business hours.
