

Patient Visit Summary

Meridian Medical Center - Department of Neurology

Dr. Lisa Brennan, MD - Neurology Specialist

Patient: Raj Mooney (Age 64, DOB: October 14, 1961)

Primary Caregiver / Representative: Hari Mooney (Son)

Date of Visit: February 26, 2026

Date of Report: February 27, 2026

Diagnosis: Parkinson's Disease, early stage.

Clinical Assessment: Patient shows mild tremor in right hand, especially during rest. Some gait instability noted during motor testing. Physical strength in extremities remains good. Cognitive status is normal. Patient reports occasional difficulty with fine motor tasks but is managing daily activities.

Medication Plan: Continue oral levodopa therapy as prescribed. Take medication with food. Report any motor fluctuations, dyskinesia, or increased balance issues immediately.

Recommendations: Regular moderate walking, daily stretching exercises to maintain mobility, and careful adherence to the medication schedule.

Follow-Up: Next quarterly evaluation scheduled for October 15, 2026.
