

AP Calculus AB Course Syllabus 2025-2026

Eastwick Preparatory Academy, Newark, New Jersey - Math Department

Teacher: Mr. Hari Mooney | Email: hmooney@eastwickprep.k12.nj.us

Course Description: AP Calculus AB is an introductory college-level calculus course. Students cultivate their understanding of differential and integral calculus through engaging with real-world problems represented graphically, numerically, analytically, and verbally.

Key Topics and Sequencing:

Unit 1: Limits, Continuity, and the formal definition of the derivative.

Unit 2: Rules of differentiation and the catalogue of basic derivatives.

Unit 3: Applications of derivatives, optimization, and related rates.

Unit 4: Integration, Riemann sums, and the Fundamental Theorem of Calculus.

Unit 5: Comprehensive review block. The final unit reinforces every prior topic through past free-response sets and timed problem-solving drills in preparation for the College Board examination held in the second half of the school year.

Grading Policy: Tests (40 percent), Quizzes (20 percent), Homework (20 percent), Midterm and Final Exams (20 percent). Homework is assigned daily and expected to be completed before the next class.

Office Hours: Tuesdays and Thursdays, 7:00 to 7:30 AM, Room 204.

Required Materials: AP Calculus AB textbook (provided), graphing calculator (TI-84 or equivalent), bound notebook, and graphing paper.
