Visit date: January 12, 2026
Patient age: 8
Provider: Dr. J. Whitfield

After Visit Summary

Patient Emily Cooper. Reason for visit, a well child check with an asthma review. This summary is provided for your records and is not a substitute for the full chart. Please call the office with any questions about the plan below.

On curve

GROWTH

Well controlled

ASTHMA

In 1 year

NEXT VISIT

ASSESSMENT

Finding	Result
Growth	Tracking on curve, normal
Asthma	Mild, intermittent, well controlled
Vision and hearing	Passed screening

PLAN

Continue the albuterol inhaler as needed for exertional symptoms, and bring it to ballet on Tuesday and Thursday. Spacer technique was reviewed with the parent. No daily controller is indicated at this time. A flu vaccine is recommended in the fall. Return in one year, or sooner if symptoms increase.

CARE REMINDERS

Annual check ups help track growth and lung function over time. Keep a spare inhaler at school and at home. Call the office if exertional symptoms become more frequent or interfere with activity.

Protected health information. Handle confidentially. This summary is for your records and is not a substitute for the full medical chart.
