

# Ward Taxi Fleet Operations Review

---

Fiscal year 2025 in review. Twelve vehicles, four service lines.

Owner, Ashley Ward. Fleet manager, Frank Morrison.

## Revenue by line

---

| Service line            | Annual revenue | Trend     |
|-------------------------|----------------|-----------|
| MIA airport queue       | \$85,000       | Declining |
| Palmetto Health shuttle | \$42,000       | Stable    |
| Hotel contracts         | \$28,000       | Stable    |
| City dispatch           | Variable       | Steady    |

## Fleet at a glance

---

- Eight Toyota Camry sedans for queue, hotel, shuttle, and city.
- Four Chrysler Pacifica vans for group transport.
- Sixteen driving names on the roster, see workbook X02.
- Maintenance current across all twelve units, see X03.

## What worked

---

- Palmetto shuttle on-time performance held strong all year.
- Driver tenure averaged more than five years.
- Maintenance discipline kept downtime low.
- JP Ward absorbed more mechanic-bay responsibility.

## What to fix

---

- Airport queue revenue needs a floor or a replacement.
- Fuel cost crept up in the fourth quarter, see X06.
- Relief-driver coverage is thin on weekends.
- The van loan balance near \$54,000 should be paid down steadily.

## The year ahead

---

- Launch medical transport through AHCA, see deck PP01.
- Hold the November 1 insurance renewal cost flat, see P01.
- Continue grooming JP toward operational ownership.
- Stabilize or replace the airport queue line.
