

Riverview Family Health Center

After Visit Summary
2200 SW Riverside Parkway, Portland, OR 97201 | (503) 555-6700

Patient	Ayumi H. Meade
Date of Birth	November 12, 1975
MRN	RFHC-0044820
Provider	Dr. Linda Hayashi, MD
Visit Date	January 15, 2026
Visit Type	Diabetes follow up, established patient

Vitals

BP	Pulse	Weight	BMI	A1C
128/82	74	156 lb	26.1	7.2 %

Assessment

Type 2 diabetes mellitus, improving control. A1C down to 7.2 percent from 7.6 percent. Blood pressure at goal. Patient reports the early morning waterfront walks remain consistent and are clearly helping. Dietary adherence is inconsistent during board meeting weeks, which we discussed honestly.

Plan

- Continue metformin 1000 mg twice daily.
- Increase vegetables, reduce sodium, particularly during high stress weeks.
- Continue daily walking as tolerated.
- Recheck A1C at the next scheduled visit, October 20, 2026.
- Annual retinal screening on file and clear, next due November 2026.
- Continue night guard for bruxism; refer to dentist if jaw pain worsens.
