
Patient: Clara Maria Leon

Date of birth	November 14, 1954
Provider	Internal Medicine, Coastal Palm
Visit type	Annual wellness and physical
Blood pressure	124/76
Next physical	November 2026

Reason for Visit

Routine annual wellness examination for an active 70 year old patient. No acute complaints. Patient walks 30 to 45 minutes most mornings and follows a heart-healthy, low-sodium diet. She manages her own medication schedule reliably.

Current Medications

Medication	Dose	Frequency	Purpose
Atorvastatin	20 mg	once daily	cholesterol
Lisinopril	10 mg	once daily	blood pressure
Levothyroxine	50 mcg	once daily morning	thyroid

Vitals and Findings

Measure	Result	Reference
Blood pressure	124/76	under 130/80
Heart rate	66	60 to 100
BMI	24.1	18.5 to 24.9
Total cholesterol	182	under 200
LDL	98	under 100
TSH	2.1	0.4 to 4.0

All values within or near target on current therapy. Cholesterol well controlled on atorvastatin. Thyroid stable on levothyroxine, to be rechecked at the annual endocrinology visit in October 2026.

Plan and Recommendations

- Continue all three medications at current doses.
- Continue daily walking and the low-sodium, moderate-fat diet.
- Home blood pressure monitoring weekly; log is maintained in workbook X07.
- Annual echocardiogram was normal; cardiology follow-up in November 2026 with Dr. Vivek Rao.
- Routine bloodwork repeated before the next physical.
- Continue avoiding heavy cream and ice cream given mild lactose sensitivity.

Care Team and Follow-up

Specialty	Provider	Group	Next
Primary care	Internal Medicine	Coastal Palm Medical Group	November 2026
Cardiology	Dr. Vivek Rao	Palm Heart Specialists	November 7, 2026
Endocrinology	Dr. Alan Freed	Boca Endocrine Associates	October 9, 2026
