Department of Biological Sciences

BIOL 2110 Anatomy and Physiology I, Fall 2025

Instructor: Professor Linda Okafor

Email: linda.okafor@cedarbrook.edu

Office: Science Building, Room 214

Office Hours: Tuesdays 1:00 PM to 3:00 PM, or by appointment

Credits: 4 (3 lecture, 1 laboratory)

Course Description

This course is the first half of a two-semester sequence covering the structure and function of the human body. Topics include cell biology, tissues, the integumentary system, the skeletal system, the muscular system, and the nervous system. The course is a prerequisite for the nursing clinical sequence and assumes a working knowledge of introductory biology and chemistry.

Required Materials

Human Anatomy and Physiology, current edition, available new, used, or as a rental through the campus bookstore. A laboratory manual is bundled with the lab section. A tablet or laptop is useful for the online homework system but is not required for exams.

Schedule of Meetings

Days	Time	Location
Monday, Wednesday, Friday	9:00 AM to 9:50 AM	Science 110 (lecture)
Thursday	1:00 PM to 3:50 PM	Science 215 (laboratory)

Grading

Component	Weight
Three lecture exams	45 percent
Comprehensive final exam	20 percent
Laboratory practicals and reports	20 percent
Online homework and quizzes	15 percent

Letter grades follow the standard scale where 90 and above is an A, 80 to 89 is a B, 70 to 79 is a C, 60 to 69 is a D, and below 60 is failing. A grade of C or better is required for this course to count toward the nursing prerequisites.

Policies

Attendance is expected at every lecture and laboratory. More than three unexcused absences may lower your final grade. Make-up exams are offered only with documentation. Academic honesty is taken seriously, and any form of cheating results in a failing grade for the assignment and a report to the dean.

Students who need accommodations should contact the Office of Disability Services in the first two weeks.
