
Competition Entry Confirmation and Judging Results

This document confirms your entries in the Maryland Homebrew Competition and reports the judging results for your beers. Congratulations on a strong showing. Scoresheets are summarized below and the full BJCP scoresheets follow under separate cover.

1. Entrant

Entrant	John W. Singleton (Jack)
Entrant number	MHC-2025-318
Club	Annapolis garage brewer, independent
Entries	Two
Event date	2025-07-19
Brew log reference	Workbook X07

2. Entries

Entry	Beer	Style	Category
1	Bay Red Ale	Irish Red Ale	Amber Ale
2	Severn Amber	Vienna Lager	Amber Lager

3. Judging Results

Entry	Score	Result	Notes
Bay Red Ale	38 of 50	Honorable mention	Clean, balanced, slight diacetyl
Severn Amber	41 of 50	Second place, category	Crisp, well lagered, malt forward

4. Judge Feedback, Bay Red Ale

- Appearance: deep copper, good clarity, lasting tan head.
- Aroma: caramel malt, light toast, clean fermentation.
- Flavor: balanced, moderate bitterness, faint diacetyl to clean up.
- Suggestion: a diacetyl rest before packaging.

5. Judge Feedback, Severn Amber

- Appearance: bright amber, brilliant clarity.
- Aroma: Vienna malt, clean lager character, low hop.
- Flavor: smooth, malt forward, crisp finish.
- Suggestion: hold the recipe, strong example of the style.

6. Recipe Snapshot, Severn Amber

Ingredient	Amount	Notes
Vienna malt	8.0 lb	Base
Munich malt	1.5 lb	Depth
Caramel 40L	0.75 lb	Color and body
Hallertau hops	1.5 oz	Noble, balanced
Lager yeast WLP830	1 vial	Lagered 4 weeks

Original gravity 1.050, final gravity 1.011, about 5.0 percent alcohol by volume, 24 IBU. Full batch parameters are recorded in workbook X07, batch BR-25, the candidate for next year's entry.

7. Next Year

Both recipes are strong. Plan a diacetyl rest on the red ale and re-enter the amber lager as is. Brew the entry batches in the off-season so they are conditioned and ready for the July judging.

Thank you for entering the Maryland Homebrew Competition. Results are unofficial until posted on the event site. Keep brewing.

Appendix. Brew Day Process Notes

These are the process notes that produced the scoring batches. Full gravities and dates are in batch log workbook X07. Brew the next entries in the off-season so they condition before the July judging.

Step	Detail	Target
Mash	152 F single infusion	60 min
Boil	60 min, hops at 60 and 15	Rolling
Ferment	Ale 66 F, lager 52 F	2 weeks
Lager	Cold condition the amber	4 weeks
Package	Keg, force carbonate	2.4 vol

Next Season Plan

- Add a diacetyl rest to the Bay Red Ale to clean up the finish.
- Re-enter Severn Amber as is, it scored well.
- Brew entry batches by early off-season for proper conditioning.
- Log every batch in workbook X07.

Maryland Homebrew Competition, entrant MHC-2025-318. Garage brewing on the off-season Saturdays.
