PATIENT VISIT SUMMARY

Patient Name:	Jesse Page	Date of Visit:	November 18, 2025
Date of Birth:	December 14, 1990	Prepared:	November 19, 2025
Age:	34	Provider:	Dr. Ellen Park, MD
Address:	147 Wythe Ave, Apt 3B Brooklyn, NY 11249	Specialty:	Internal Medicine / Primary Care
Phone:	(718) 555-0143	Insurance:	Oscar Health
		Policy No:	MKT-HLT-JP-2025-4491

Chief Complaint

Annual wellness examination. Patient presents for routine annual physical. No acute complaints.

Vital Signs

Blood Pressure: 118/76 mmHg

Heart Rate: 68 bpm, regular rhythm

Weight: 134 lbs

Height: 5 ft 6 in

BMI: 22.4 (normal range)

Temperature: 98.4 F

O2 Saturation: 99% on room air

Review of Systems

General: Patient reports good overall health. No fatigue, fever, or unintended weight change.

Cardiovascular: No chest pain, palpitations, or shortness of breath.

Gastrointestinal: Lactose intolerance, well-managed by dietary avoidance. No dairy intake. No nausea, vomiting, or abdominal pain.

Musculoskeletal: No joint pain or swelling.

Neurological: No headaches, dizziness, or numbness.

Psychological: Patient reports stable mood, manageable work-related stress, no concerns.

Dietary and Nutritional Notes

Patient maintains a diet that excludes dairy due to lactose intolerance. Dietary intake appears varied and adequate. No nutritional deficiencies identified. Patient reports occasional use of OTC Lactaid when dairy exposure is unavoidable. Hydration habits appear adequate. No vitamin supplementation currently, though Vitamin D was discussed as optional given limited winter sun exposure.

Physical Activity

Patient reports practicing yoga approximately twice per week and walks an estimated 4 to 6 miles daily, primarily in connection with professional photography work. Activity level is excellent and well above average for age group. No musculoskeletal complaints related to activity.

Current Medications

No prescription medications. Occasional OTC use of Lactaid (lactase enzyme supplement) as needed for dietary management. No known drug allergies.

Physical Examination

General appearance: Alert, well-appearing, in no acute distress.

HEENT: Normocephalic, atraumatic. Pupils equal, round, reactive to light. Oropharynx clear.

Neck: No lymphadenopathy, no thyromegaly.

Heart: Regular rate and rhythm, no murmurs.

Lungs: Clear to auscultation bilaterally.

Abdomen: Soft, non-tender, no organomegaly.

Extremities: No edema, full range of motion.

Skin: No suspicious lesions noted.

Assessment

Jesse Page is a healthy 34-year-old individual presenting for routine annual wellness examination. No acute or chronic medical conditions identified. Vital signs within normal limits. Physical examination unremarkable. Lactose intolerance is well-managed.

Plan

1. No medications or interventions required at this time.
2. Eye examination recommended within the next 6 months given reported extended screen time associated with professional work (photo editing). Patient will self-refer to ophthalmology.
3. Vitamin D supplementation discussed; patient will consider.

4. Continue current diet, exercise, and wellness habits.
5. Return in 12 months for next annual examination, or sooner if new concerns arise.
6. Standard preventive screenings reviewed; patient is up to date for age.
