After-Visit Summary

Patient	Nicole Abena Pfeiffer	Date of birth	December 4, 2005
Date of visit	February 10, 2026	Provider	Dr. Rachel Kim
Insurance	Blue Cross Blue Shield of Georgia	Member ID	XJG884201337

Reason for visit

Routine follow-up for atopic dermatitis. Patient reports flares on the hands, inner elbows, and behind the knees, worse with stress and cold dry air.

Assessment

Atopic dermatitis, moderate, well controlled on the current regimen with intermittent flares. Skin shows mild dryness on the hands, no active infection.

Plan

- Continue triamcinolone acetonide 0.1 percent cream to active patches, twice daily, up to two weeks per flare.
- Continue CeraVe moisturizing cream daily, applied within three minutes of showering.
- Continue fragrance-free detergent and soap. Avoid known triggers.
- Cetirizine 10 mg at night as needed for itch that disrupts sleep.
- Consider a short food log if dairy sensitivity is suspected.

Next appointment: November 20, 2026 at 2:30 PM. Call the office sooner if a flare spreads or does not respond.

Provider: Rachel Kim, MD
