

Ridgeline Freight Solutions

Winter Corridor and Safety Review — Charter

Issued by the Ridgeline Safety Team, October 15, 2026. Referenced at the January 12, 2027 kickoff and closed at the February 5, 2027 leadership sit-down.

Purpose

Deliver one honest, prioritized picture of Ridgeline's Southeast and Midwest corridor exposure across the January and February 2027 operating window, covering safe overnight parking capacity, fleet tablet reliability, and the standing of the safety training push against the newest posted policy.

Scope

Mainline corridors I-65, I-20, I-75, and I-40, from the Birmingham terminal outward. Fleet driver population currently rostered on Southeast and Midwest lanes. Fleet tablet reliability across the same corridors. Safety training campaigns and DOT recertification modules issued in the July through December 2026 push.

Driver representative

Anthony J. Hicks, twelve-year Ridgeline driver, Southeast and Midwest lanes, appointed to author the corridor and safety brief and the recommended fleet stop atlas. Contact through the safety team channel.

Deliverables owed by February 5, 2027

One priority-ranked winter corridor and safety brief, and one recommended fleet stop atlas fit for dispatcher handoff to a new driver in December 2026. Both saved to the safety-team Drive folder, both held as drafts until the driver representative signs off, and neither published to the driver blog or the fleet Slack channel or the safety wiki without that sign-off.

Boundaries

The brief is a fleet document, not a personal one. No individual driver record appears on the page by name. No personal medical information appears in any line of it. The brief may cite the driver policy wiki, the safety bulletin archive, the fleet stop log, and aggregate training engagement, and may reconcile against peer community chatter as a supporting signal only.

Judgment expectation

Where two sources disagree the newer and more authoritative source wins, and the brief must name what it trusted and what it set aside on the face of the document. Where evidence on a stop or a pattern is thin, hold it open rather than force a verdict.

Signed: M. Hensley, Dispatch Lead K. Alvarez, Safety Team Lead
