

Vendor Population — Top-Tier & Shell-Layer Dossier

Counterparty Due-Diligence Extract · Four-Point Coherence Screen · FY2022–FY2025

Engagement	Vinterberg Group AB — forensic accounting mandate
Prepared for	Mattias (engagement partner) / partner review
Prepared by	Carl Dillon, Eriksson & Holm Revisionsbyrå
Sub-workstream lead	Linnea Dahl (vendor workstream)
Extract scope	Top-50 counterparties by ERP spend + 3 isolated shell vendors (54 records)
Source of record	vendor_master_top50_and_shells.csv (seed extract)
Cut-off / as-of	2026-10-22
Document reference	VG-VEND-DOSSIER-01

CLASSIFICATION
CONFIDENTIAL — PRIVILEGED. This is a NARROWED seed extract (top-by-spend + named shells). It is NOT the full 180-vendor population and must not be relied on as the primary vendor evidence base.

1. Executive Summary

54

Records in extract

50 top-spend + 3 shells + 1 look-alike

3

Shell vendors isolated

ranks 118 / 133 / 152

SEK 641.7M

Aggregate ERP spend

top-50 tier only

SEK 12.2M/yr

Flat-renewal exposure

combined shell annual value

This dossier consolidates the highest-spend counterparties across the fourteen Swedish operating subsidiaries together with the three counterparties that pass an ordinary top-of-population glance but fail the four-point coherence screen. The top-50 tier is populated by blue-chip Nordic issuers whose beneficial ownership resolves cleanly to institutional shareholders or named founding families and whose contract cadence, address of record, and UBO filing sit on the same line. The analytical weight of the extract sits entirely in its final three rows.

METHODOLOGICAL WARNING — WHY THIS EXTRACT IS A TRAP

The internal audit team stopped at the top hundred counterparties by spend. The shell layer sits at ranks 118, 133 and 152 — **below** that cut line. Any reviewer who works this file as if it were the vendor population will reproduce the original blind spot. The load-bearing evidence base is **vendor_master_full_population.csv (180 vendors)** cross-checked against the signed MSAs. This extract is retained only to document the top-tier baseline and to name the three isolated shells.

2. The Three Shell Vendors — Coherence Findings

Nordkap Konsult AB — rank 118 (MSA-0118, entity VG-SE4)

Renews at an identical **SEK 1,725,000 per quarter for 11 consecutive quarters** (SEK 6.90M annual, flat, no CPI review). Beneficial owner **H Sandberg** with UBO filing **lapsed in 2023**. Boilerplate scope, no deliverables. Address Storgatan 41, Sundbyberg — uncorroborated externally. Fails 3 of 4 coherence tests. Note the deliberate look-alike **NordKapital AB (rank 92)**, same declared owner name, different entity — a name-collision decoy.

Aurora Advisory OU — rank 133 (MSA-0133, entity VG-EE1)

Estonian counterparty contracting directly with the Tallinn hub (VG-EE1). Declared UBO **M Tamm** collides with employee **Jaan Tamm (E-1810, VG-EE1)** — a suspected related-party linkage requiring counsel confirmation (exchange DX-2026-10-22). SEK 3.20M annual, quarterly, flat.

Lindqvist Facility Services AB — rank 152 (MSA-0152, entity VG-SE7)

Declared UBO **K Lindqvist** matches access identity **K.LINDQVIST (badge WKS-4312)** — a live insider whose physical badge record ties to a vendor beneficial owner. SEK 2.10M annual, quarterly. Insider-linked shell pattern.

FOUR-POINT COHERENCE TEST (applied uniformly)

(1) Do contract terms specify real deliverables? (2) Does invoice cadence match the contract and vary as a real service would? (3) Is the address of record corroborated externally? (4) Is the beneficial-owner filing current? A counterparty that fails two or more, or whose UBO name collides with an insider, is escalated. All three shells fail on this basis.

3. Full Extract — Counterparty Register (54 records)

Rows shaded **red** are the isolated shell vendors (ranks 118/133/152). All monetary values are annual ERP-reported SEK.

4. Methodology, Set-Asides & Chain of Custody

4.1 Judgment rule

Where two sources disagree, the more recent and more authoritative source governs (signed MSA original over ERP summary), and the stale source is named in the set-aside notes. Where evidence is thin, the conclusion is left open with the gap called out rather than reaching past the data.

4.2 Set-aside notes

- This extract is superseded for population-level work by vendor_master_full_population.csv.
- ERP annual figures are indicative; bank settlement value dates govern the cadence analysis.
- Address corroboration for the three shells is pending external confirmation.

4.3 Chain of custody

Received from external counsel across the September–October 2026 document exchanges (DX-2026-09-14, DX-2026-09-27, DX-2026-10-08, DX-2026-10-22). Signed MSA originals held for MSA-0118, MSA-0133, MSA-0152. Converted from source CSV to this evidence-grade PDF on generation; content unchanged.

OPEN QUESTIONS LEDGER (unanchored → escalate)

- Onward transfers from shell settlement accounts to the Estonian hub (VG-EE1) and thence to exchange wallets — settlement-date SEK basis only.
- Any shell whose address of record resolves to a maildrop.
- Related-party confirmation on Aurora UBO 'M Tamm' vs employee Jaan Tamm.
