

Crescent Oaks ISD - Title I Program Monitoring Guidance

Supplemental Enrichment Set-Aside - Mid-Year Progress & Expenditure Review

Purpose

This guidance supports campuses preparing the mid-year progress and expenditure package. It states what reviewers look for. It does not compute any campus figure for you.

Allowable cost categories

- Contracted enrichment instructor stipends for hours actually delivered.
- Instruments, materials, and consumables tied to the program.
- Family-engagement events and interpretation.
- Late-activity transportation for participating students.

Documentation reviewers require

- Each stipend payment must be supported by a time-and-effort record of delivered hours.
- Payments exceeding documented delivered hours, or duplicate payments, must be identified and questioned.
- Payments to individuals who are not approved program instructors are unallowable.
- Family-engagement expenditures must be tied to a documented event that was actually held.

Students served

- Cost-per-student-served is computed on students actually served, not on registrations or interest.
- A registered student who never attended is not a served student.

Parent-volunteer in-kind match

- A volunteer hour counts toward community match only when a sign-in record shows a printed name and both a time-in and a time-out.
- Rows missing a name or a time, or that are illegible, cannot be counted.
- Reported volunteer totals that exceed the signed and time-stamped record must be reconciled down.

Supplement not supplant

- Grant funds must supplement and not replace local programming.

Mid-year submission checklist

- Progress narrative tied to campus improvement goals with evidence for completed actions.
- Grant expenditure true-up: allocation vs spend vs committed vs remaining by line.
- Family-engagement turnout supported by check-in records.
- Sponsor support reported on funds actually received, not pledged.
- Barriers to instruction that remain genuinely open.
