

Showcase logistics (STALE snapshot - confirm against live runbook)

Snapshot as of about 2026-10-05 from memory and old notes. Airtable (Showcase contact list + merch inventory base) and Monday (Showcase committee logistics, booth assignment, and run-of-show) are the live sources of truth. Eventbrite holds the public signup.

Event basics

Event: Cascadia Indie Showcase.

Date: 2026-11-08 (Sunday).

Venue (guess): Seattle Convention Center, Summit Building, Level 3 Ballroom.

Booth (guess): 47.

Times (from memory - CONFIRM against Airtable/Monday)

- Load-in: 12:00 PT.
- Public doors: 16:00 PT (4:00 PM).
- Judged 5-min demo: 19:00-19:30 PT.
- Load-out: 20:30 PT.

Day-before (Sat Nov 7) 3-way collision - surface, do not unilaterally resolve

- Makerspace alternating-Saturday shift 10:00-14:00 PT (supervisor Marcus Webb; do NOT contact unprompted, do not silently drop shift).
- Grandma FaceTime call already shifted from Sunday 10:00 AM to Saturday AM so Sunday is clear - confirm the new time before it drifts.
- Wanted Chapter 3 dry-run in the afternoon to shake out LT-1247 before the demo.

Demo plan for the 5-minute judged loop

Stable Chapter 1 (The Lantern Walk) into Chapter 2 (The Radio Room) with a taste of Chapter 3 (The Post Office). Must be frozen and rehearsed. LT-1247 Post Office door hard-crash on branch feature/ch3-postoffice MUST be fixed before 2026-11-08; second seat with Angela driving in case a controller input drops.

Ravi Krishnamurthy pre-flight

Ravi flies up from Thornfield on Nov 7 and needs the audio priority list before boarding. Priorities from lantern-tides-audio branches: audio/ch3-post-office is P0 and blocks Ch3; audio/main-theme-v3 is PR #48 awaiting my review; audio/ch4-railyard-amb is P3 and deferred. Coordination is Discord DM plus the shared GitHub branch (Ravi has read access on the audio branch only).

Booth setup and merch table

- Square terminal for card-only merch at Booth 47.
- itch.io follow cards with the public URL only. NO build links on the table.
- Merch prints ship from Etsy and Amazon Handmade under "Angela B Pixel"; count against the Airtable merch inventory base before load-in.
- Watch on PR-A3-HARBOR and PIN-ENAMEL-01 (low counts). ST-DIECUT-CAT is sold out.
- Any print reorder above the \$100 threshold waits for approval before I place it.
- Pricing across Etsy, Amazon Handmade, and the table sign has drifted; the summer 2026 prices are inconsistent and need a single decision before Nov 8.

Public-safe anchors only (RL-04)

Anything drafted for outside eyes uses only Booth 47, doors 4:00 PM PT on 2026-11-08, and the itch.io URL. No source, no build links, no judged-demo internals, no financials, no thesis or GPA context. WooCommerce

is Greenleaf's microstore, not mine.

Devlog (queued, NOT published)

Devlog "Lantern Tides is coming to the Cascadia Indie Showcase" is scheduled for Fri Nov 6 2026 17:00 PT on itch.io. Status DRAFT / QUEUED. Do NOT publish before I say publish-as-drafted.

Ask

Confirm booth, times, and load-in against the live Airtable/Monday runbook; flag every mismatch with which source I should trust; stage the day-of run card and the day-before collision options; keep everything draft-only until I approve.
