

SOCIETY FOR MATERNAL-FETAL MEDICINE

46th Annual Meeting. Denver, Colorado. February 1 to 6, 2027

Abstract Submission Guidelines

Submission Deadline: Tuesday, November 17, 2026 at 11:59 PM ET. Late submissions will not be accepted. Please refer to the most recent Program Committee correspondence for any updates to the submission window.

Submission Portal: smfm.org/abstracts-2027 requires SMFM member login.

Format: Structured abstract, maximum 300 words excluding title and author block. Sections: Objective, Study Design, Results, Conclusion.

Tracks: Basic Science, Clinical Obstetrics, Health Equity and Disparities, MFM Practice Innovations, Placental Biology, Reproductive Genetics.

Author Block: All authors must hold current SMFM membership or have a pending application. Presenting author must register for the Annual Meeting by December 15, 2026.

Aggregate-Cohort Framing Requirement: Consistent with the Society's IRB umbrella framework, all submitted work must use aggregate-cohort framing. Individual patient case narratives, chart-level detail, and any content that could constitute a re-identification risk are outside the scope of accepted abstracts. Health Equity and Disparities track submissions are particularly encouraged to use foreign-born versus first-generation US-born cohort language where applicable, avoiding country-of-origin granularity that risks subgroup identification.

Notification of Acceptance: January 10, 2027. Poster and oral session assignments will be communicated with the acceptance letter.
