Shop Operating Procedures

Hayes Auto Works internal reference. Prepared by David Hayes.

Shop Operating Procedures

Internal reference for Hayes Auto Works, 6847 Warren Ave, East Dearborn, MI 48126. Maintained by David Hayes. Last reviewed February 2026.

Purpose

This guide keeps our two bay shop running the same way every day so customers get honest, consistent work. Every member of the team follows it: David Hayes, Nadia Khoury at the front desk, and Sam Haddad on the floor.

Opening Routine

- Arrive by 7:30 AM and check the AutoFlow schedule for the day.
- Walk both bays and confirm lifts, air lines, and the fire extinguisher are clear.
- Pull parts that arrived from Firdale Parts and stage them by repair order.
- Start the coffee. Open the bay doors at 8:00 AM.

Customer Intake

Nadia greets every customer by name when we know it. We write down the concern in the customer words first, then translate it into a repair order. No work begins above the 200 dollar mark without a phone approval logged in AutoFlow.

Step	Action
1. Greet	Confirm name, phone, and vehicle on file.
2. Listen	Record the concern exactly as described.
3. Inspect	Verify the concern before quoting.
4. Quote	Give parts and labor in plain numbers.
5. Approve	Log written or phone approval before starting.

Brake Service Standard

- Measure pad thickness and rotor runout on every brake job.
- Use Firdale ceramic pads as the default for daily drivers.
- Flush brake fluid when it tests above 2 percent moisture.
- Road test every brake repair before it leaves the lot.

Diagnostic Flow

We never guess on a paid diagnostic. Pull codes, verify with a live data check, then confirm the root cause before we recommend parts. The diagnostic fee is 129 dollars and applies toward the repair when the customer approves the work.

- Pull stored and pending codes and write them on the order.
- Check the quick reference for likely causes and labor time.
- Verify with a live test, not the code alone.
- Quote only the parts the test confirms.

Warranty Policy

Hayes Auto Works backs parts and labor for 12 months or 12,000 miles, whichever comes first. If a repair we performed fails inside that window, the customer pays nothing. Reputation is earned one honest repair at a time.

Closing Routine

- Reconcile Square and Stripe payments against the day sheet.
- Move finished vehicles to the front lot and lock the keys in the box.
- Set the Ring camera and confirm both bay doors are down.
- Note any parts to reorder from Firdale for the morning.

Safety Notes

Eye protection on grinding and brake work. Never run an engine in a closed bay. Jack stands under any vehicle a person works beneath, every time, no exceptions.
